⚠ WARNING

Never attempt to look into the sun with binoculars.

⚠ WARNUNG

Blicken Sie nie mit einem Fernglas in die Sonne.

⚠ ATTENTION

N'observez jamais le soleil avec vos jumelles.

⚠ AVVERTENZE

Non guardate il sole attraverso il binocolo.

⚠ ATENCION

Nunca intente mirar al sol con prismáticos.

⚠ WAARSCHUWINGEN

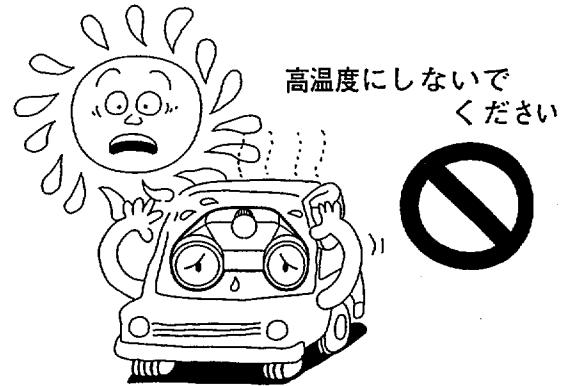

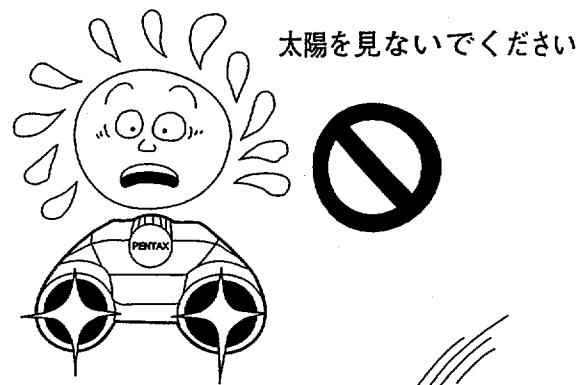

Probeer nooit recht in de zon te kijken met de verrekijker

⚠ 警告

切勿使用望遠鏡觀望太陽。

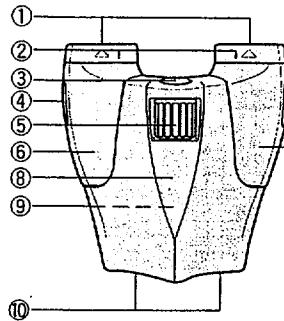

⚠ 警告

双眼鏡で太陽を絶対見ないで下さい。

温度差のある場所では
注意してください

- ⑩ 物鏡

Features

Pentax UCF X Series (Uni-barrel Center Focusing) binoculars are designed with advanced technology gained through many years of superior optical design experience and unsurpassed by any standard for this kind of binoculars.

The adoption of an optical system employing high-refraction glass prisms, multi-coating and aspherical lenses ensures a bright, sharp image across the entire field of view.

For all its compactness, the UCF X Series has a long eye relief for easy viewing even with glasses. The minimum focusing distance, shortened further in the UCFX, gives you clearer images of closer objects.

Based on "solidness and sharpness", the UCF X Series is very compact, lightweight and easy to handle with improved anti-shock rubber coverings.

▲ WARNINGS

1. To avoid serious eye damage, NEVER look at the sun using the binoculars.
Serious damage to the retina, or total loss of eyesight may occur.
2. Do not leave the binoculars in direct sunlight. Sun rays passing through the binoculars will be intensified, and should they focus on flammable materials, fire may occur.

▲ Safety Precautions

1. Do not use the binoculars while walking as depth perception and peripheral vision are dramatically altered.
2. Caution should be taken when adjusting the binocular barrels to avoid fingers being pinched.
3. Using the binoculars continuously for a long time may cause inflammation of the skin around the eye where the eyepiece ring come in contact with the skin. Consult a physician if any symptoms are noticed.
4. Do not swing the binoculars by the neck strap.
5. Be careful with the vinyl bag. Keep the vinyl bag in which the binoculars are packed for delivery, and all other vinyl bags, out of the reach of children and infants, as there is a risk of suffocation.

Handling Precautions

1. Do not apply excessive force when adjusting the focusing wheel, diopter adjusting ring, eyepiece width or when mounting the binoculars on a tripod.
(Please use the optional Tripod Adapter U to mount the binoculars on a tripod.)
2. Do not drop the binoculars or subject them to strong vibration, impact or pressure.
3. Never expose the binoculars to high temperature (Over 60 degrees centigrade or 140 degrees Fahrenheit). Avoid leaving the binoculars for an extended period of time in a hot humid place such as in a car parked in the sun or near a heater, as this could cause the binoculars to become deformed.
4. Care should be taken when the binoculars are taken between two places with widely varying temperatures difference as condensation or, in extreme cases, icelets may form that could cause rust or other damage. In such circumstances the binoculars should be covered so that the temperature change will be as gradual as possible. After the temperatures have stabilized, the binoculars may be uncovered and used again.
5. Reasonable care should be taken to prevent exposure to dirt, mud, sand, moisture, toxic gas, water, salt water, or any other substance which may penetrate the inside of the binoculars, or the mechanisms. These substances may cause internal damage or render the binoculars inoperable.
6. Keep in mind that the binoculars are not water or weather resistant. If water splashes onto the binoculars, allow them to dry naturally, then wipe away any residual dirt with a clean, soft, dry cloth.
7. Binoculars should be stored in a well-ventilated place to prevent fungus growth. Never store them in a closet with mothballs or in an environment where chemicals are handled.

English

How to Use

1. Eyepiece Rings

For easy viewing, the binoculars are usually operated with the eyepiece rings pulled out. (see 1)
When wearing glasses, push back the eyepiece ring to the original position.
When pulling out the eyepiece ring, do not pull too strong. Do not attempt to rotate it.

2. Adjusting the Eyepiece Width

While looking at a distant object through both the right and left eyepiece lenses, adjust the barrels so that eyepieces are comfortably in front of your eyes.(See 2)

3. Adjusting Diopter

While looking through the left eyepiece lens with the left eye only, turn the central focusing wheel to focus on a distant object sharply. (See 3-1.)

Next, press the diopter adjusting ring to set it to the diopter adjustment position (as shown in 3-2.) While looking through the right eyepiece lens with the right eye, turn the diopter adjusting ring until the same object comes into sharp focus. (See 3-3)

After focusing is completed, press in the diopter adjusting ring to the original, fully-retracted position to prevent it from being turned.

To view objects at different distances, focus by just turning the central focusing wheel to the right or left.

4. Mounting Binoculars on Tripod

To mount the binoculars on a tripod, screw the optional Tripod Adapter U into the tripod socket and attach the binoculars on to the tripod.(See 4)

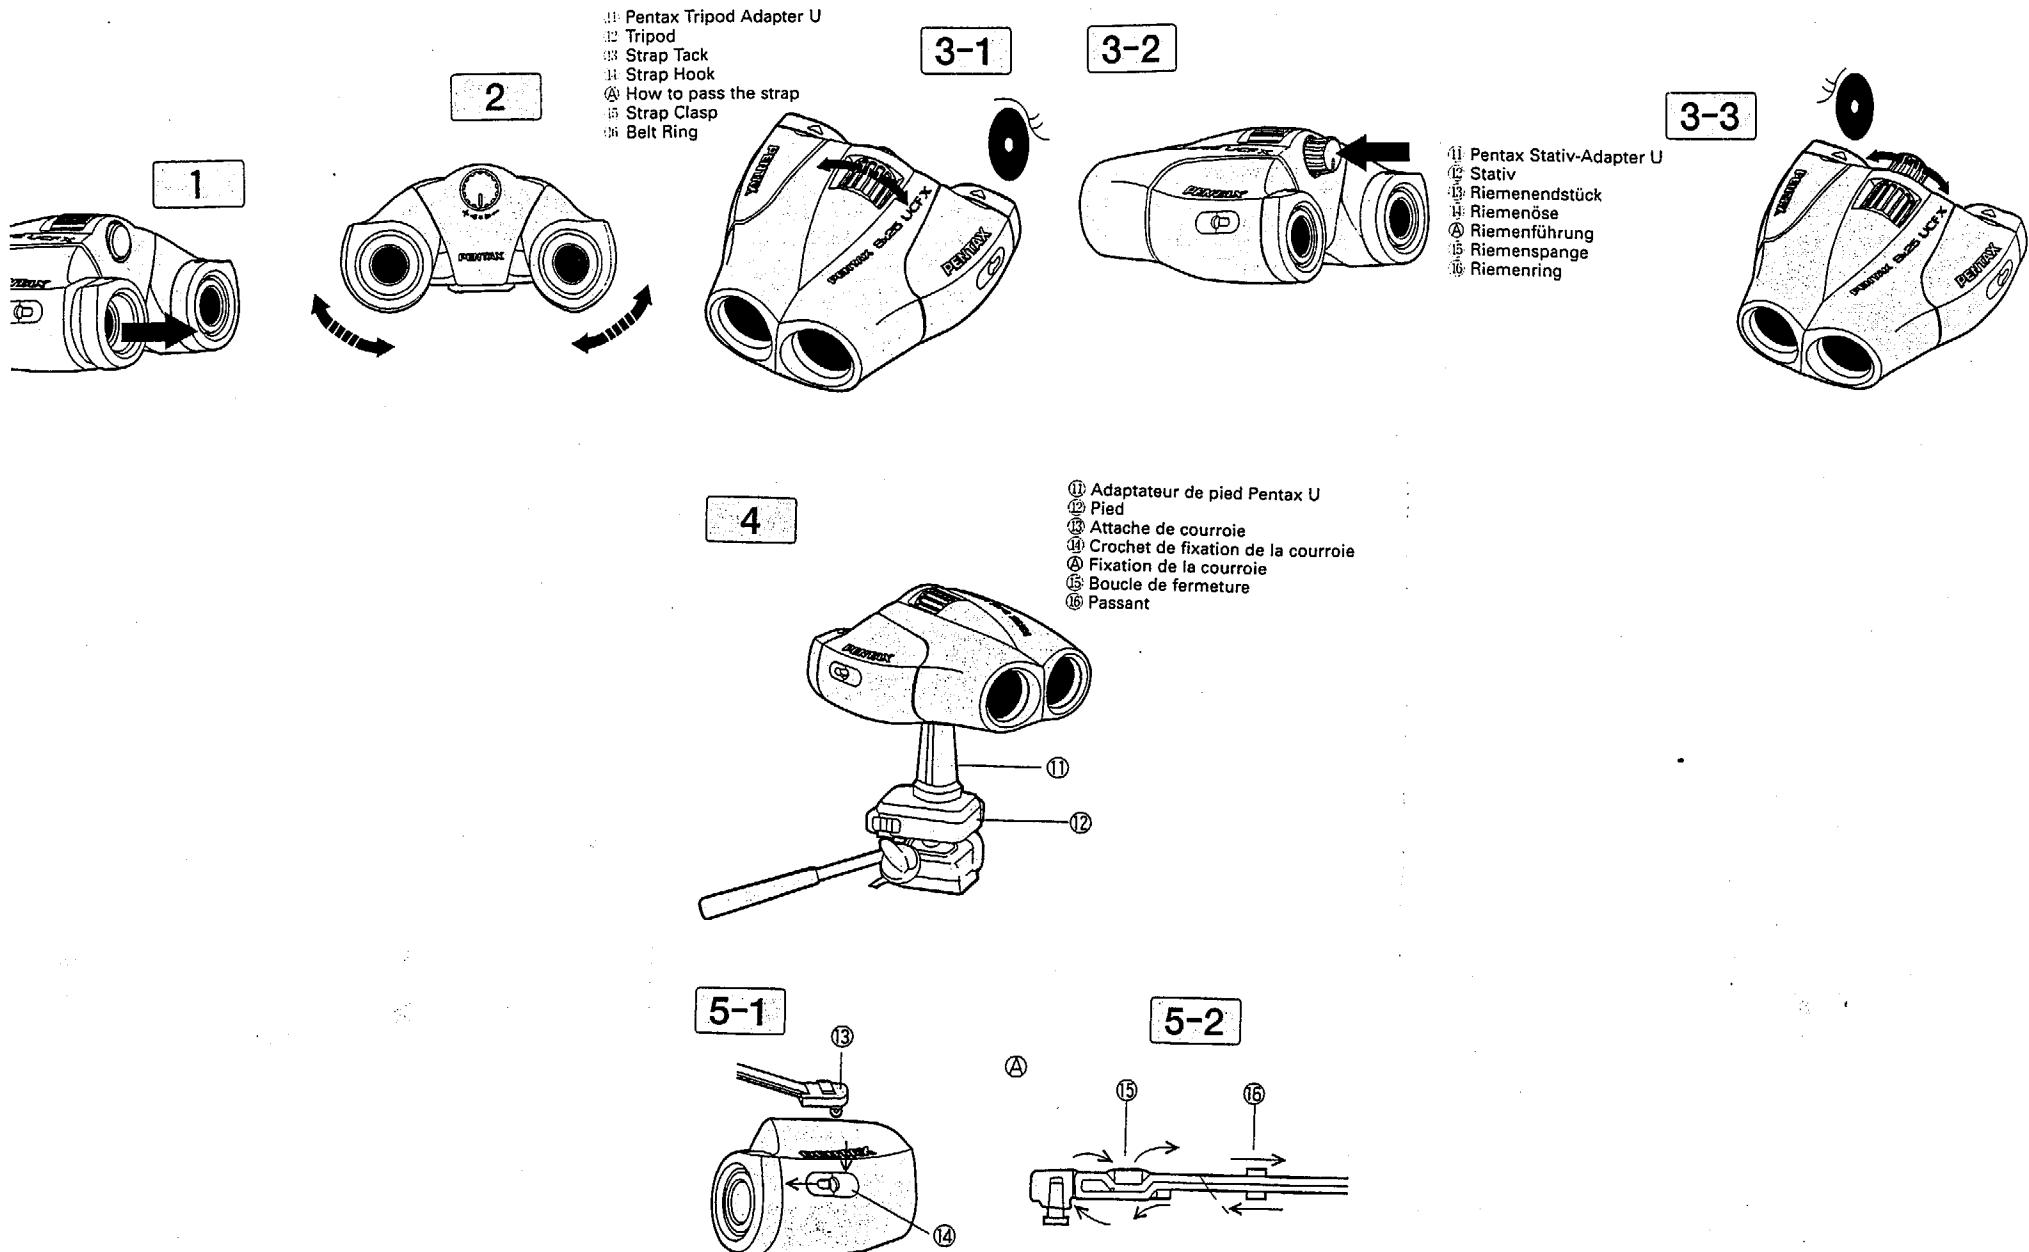

5. Attaching Neck Strap

To attach the neck strap to the binoculars, put the tip of the strap tack in the strap hook, and slide the strap tack to the eyepiece lens side while pressing it until it clicks. (See 5-1)

Check to see if the strap is securely attached to the binoculars by pulling the strap.

The strap length can be adjusted according to your preference. It is best to provide enough slack in the strap for easy adjustment. (See 5-2)

CAUTION: Do not pull the strap in the direction perpendicular to the top of the uni-barrel.
